## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 20 November 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### **DETAILED ACTION**

Applicant's election without traverse of Group IV invention, filed on 20 November 2006 is acknowledged.

Applicant's amendment filed on 20 November 2006 is acknowledged and entered. Following the amendment, the original claims 1-20 are canceled, and the new claims 21-32 are added.

Currently, claims 21-32 are pending.

Upon reviewing the new claims and further consideration, second restriction requirement is warranted.

#### **Election/Restrictions**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 22-24, 25 in part, and 26, drawn to a method of modulating an activity of a cell with an antibody to IL-17C, wherein the cell is in a subject suffering from psoriasis, classified in class 424, subclass 130.1.
- II. Claims 22-24, 25 in part, 27 and 28, drawn to a method of modulating an activity of a cell with an antibody to IL-17C, wherein the cell is in a subject suffering from an interstitial lung disorder, classified in class 424, subclass 130.1.
- III. Claims 22-24, 25 in part, 29 and 30, drawn to a method of modulating an activity of a cell with an antibody to IL-17C, wherein the cell is in a subject suffering from IBD, classified in class 424, subclass 130.1.
- IV. Claims 22-24, 25 in part, and 31, drawn to a method of modulating an activity of a cell with an antibody to IL-17C, wherein the cell is in a subject suffering from asthma or allergy, classified in class 424, subclass 130.1.
- V. Claims 22-24, 25 in part, and 32, drawn to a method of modulating an activity of a cell with an antibody to IL-17C, wherein the cell is in a subject suffering from atherosclerosis, classified in class 424, subclass 130.1.

The inventions are distinct, each from the other because:

Art Unit: 1646

Inventions I-V are distinct each from each other because they are the methods of treating different medical conditions, which have different causes, and therefore, involve distinct patient populations, have distinct pathological and clinical manifestations, distinct features in progress and prognosis, and require different therapies. Therefore, each group requires a separate search of the prior art.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their recognized divergent subject matters, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143), and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
